

## Student Directions

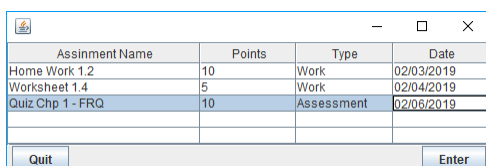

First, go into the folder of the period in which you are grading and click on the program *student\_grader.jar*. When you do this the first of two windows will open up:

Assinment Name	Points	Type	Date

Quit Enter

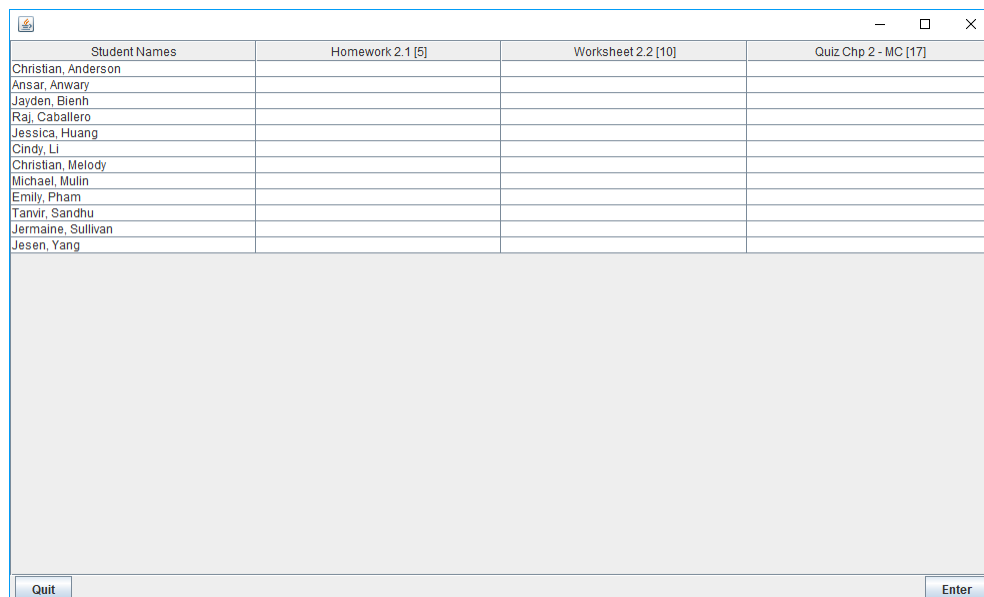

This is where you input the information about the assignments [up to 5]. The first two columns are the assignment name and total points which the teacher will give you. The third column is the assignment type which will either be *Work* or *Assessment*. **It is very important that Work and Assessment is spelled correctly with the first letter being capitalized and the remaining letters be lower case.** The last column is for the assignment data and it must be in the format MM/DD/YYYY. **It is very important that the month and day are written in two digits and the year is written as 4 digits. If the month or day is less than 10 add a zero to the begging of it.** Here is a sample:

Assinment Name	Points	Type	Date
Home Work 1.2	10	Work	02/03/2019
Worksheet 1.4	5	Work	02/04/2019
Quiz Chp 1 - FRQ	10	Assessment	02/06/2019

Quit Enter

After you hit enter a new window will pop up where you can input the students' scores for each assignment. After you are done hit enter. Here is what this window looks like:

Student Names	Homework 2.1 [5]	Worksheet 2.2 [10]	Quiz Chp 2 - MC [17]
Christian, Anderson			
Ansar, Anwary			
Jayden, Bienh			
Raj, Caballero			
Jessica, Huang			
Cindy, Li			
Christian, Melody			
Michael, Mulin			
Emily, Pham			
Tanvir, Sandhu			
Jermaine, Sullivan			
Jesen, Yang			

Quit Enter

Once you have completed inputting and saving all of the assignments return the flash drive to the teacher.
